

BNCS type

FLAMEPROOF EX D • INCREASED SAFETY EX E • FOR INDOOR & OUTDOOR APPLICATIONS
FOR UNARMoured CABLES • OUTER SHEATH SEAL

1 Cable glands BNCS type (code: BNCS)

The sealing ring blocks the cable on the cable sheath outer diameter. The addition of female thread on the backnut allows the cable gland to be coupled to a conduit fitting.

A backnut that is going to be screwed onto the body of the cable gland serves to block in position the intermediate body.

Metric cable glands are made according to EN 62444 standard.

Maintenance and installation operations and product selection must be done in accordance with IEC EN 60079-14 and 17 standards.

Application fields Surface - Group II • Mines - Group I

Available threads

ISO 262 Metric • ISO 228 • DIN 40430 Pg

ANSI B1.20.1 NPT • EN 10226 Gk (only for ATEX)

Degree of protection

The cable glands degree of protection is **IP66** or **IP66/68**, 30-meters depth for 7 days according to the IEC EN 60529 standard; the degree of protection IP 68 is obtained by using flat sealing rings on cable glands with cylindrical threads. Without gaskets, the degree of protection is IP 66. If the cable glands with cylindrical or tapered threads are screwed on the threaded hole of an apparatus, in order to guarantee an IP66 or IP66/68 degree of protection, threaded parts must be sealed with Loctite or similar. In order to maintain the IPX8 degree of protection, the cable entry shall be fitted on enclosure which satisfies an immersion test under 30 meters of water during 7 days. Metric cable glands are made in accordance to EN 62444 Standard.

0 Kit version (code: KIT)

Includes cable glands and

the requested complete series of

the rubber seals accompanying the size.

COMPONENTS

Backnut

Compression seal ring

Inner seal

Compound container

Body

OPTIONS

O-Ring
Only for Metric threads.
(See page 142)

Sealing washer
(See page 136)

Serrated washer
Only for Metric and NPT threads.
(See page 137)

Locknut
(See page 134)

Shrouds
(See page 138)

Earth tags
(See page 135)
