

How to order **ACCESSORIES**
& complete the **CODE**:
see on each data sheet

RCN has a wide range of accessories for cable glands.

Starting with the thread adaptors: "A" Series male-female, "N" Series male-male nipples, "M" Series female-female couplings. Available in multiple combinations of thread and measurement.

The available threads are ISO Metric ISO262-M, ISO228, DIN40430 Pg, ANSI/ASME B1.20.1 NPT, EN 10226.

These accessories are useful when you need to adapt a hole device to a cable gland, reducing time and costs in the process of execution of the system.

To close the unused cable entries, "T" series plugs are available.

An indispensable series of accessories are also available to complement in different materials, such as locknuts, grounding plates, flat gaskets, O-rings, spare part shrouds and rubber seals for the cable glands of the "R" and "B" series.

All products hold ATEX, IECEx, EAC certifications.
